Job Application for Software Engineer

Dear Mr./Ms./Dr. LastName,

About Me

Hello! My name is Penn Rosen.

I am a New York City-based Software Engineer with a passion for good design, clean code, and useable interfaces.

At my day job at Saks Fifth Avenue, I build interactive special projects with a strong focus on user experience, animation, and accessibility. We are currently in the process of migrating from Angular to React - a clear-sighted initiative, in my opinion.

Why Google?

I found the posting for "Front End Developer, NYT Cooking Team" and immediately recognized a great fit.

Why Me?

Relevant to the position is my recent newsroom experience at The Guardian. As a solo dev, I built an extended feature for a high-profile Amazon web series.

Outside of the web, my main interest is in the kitchen. I cook often. I frequently pull recipes from the NYT Cooking site — the recipe for No-Knead Bread is a true classic and a personal go-to.

I will be happy to provide references upon request. Please feel free to contact me by by phone or email.

Many thanks for your time. I hope to hear from you soon.

Kindest Regards,

PENN ROSEN
